<td>14.</td>
<td>History: Mill built by Gullian Gerig (colloquialized to Killian Kreek); mill site approved by jury in 1798, when still part of Warren County; was second mill in Barren County. Kreek was a stone mason/builder; later moved to Indiana and built courthouse in Gibson County in 1814 (now demolished). An old Indian trail went past the mill location, later used as road. The mill was used as a distillery around 1900. Congregational baptisms were done in the mill pond in 1910.</td>

B. _____________________________
C. _____________________________
D. _____________________________
E. _____________________________
F. _____________________________

42. Total Acreage in Present Property: 6.88 acres

43. Acreage included in proposed N.R. boundary:

44. Site Plan (and boundary description and justification for N.R. sites):

See Attached

45. Description and House Plan:

Single-cell, about 30 x 30 feet, dry-stone mill, built on bank of Beaver Creek; ruins of mill dam below mill. Undershot wheel was under floor. Has hewn log framing, pegged window frames, batten "Dutch" doors with strap hinges (now stored in garage). Mill originally had second story of frame, with gambrel roof (see drawing, attached); and two-story frame shed-roofed section on each side. These deteriorated after severe flooding—present gable roof built to cover one story in 1957. Mill stones removed to yard of owner. Sawn-frame barn at site has hollow log trough. Stone is fossiliferous limestone, Ordovician.

13. Statement of Significance: (Continued)

technique of the builder, Gullian Gerig. It survives as representation of the once flourishing pioneer milling industry throughout the Commonwealth and is the only surviving example of an undershot wheel of the period in Kentucky. It is the only remaining early stone building in Barren County and illustrates dry-stone masonry technology in an early industrial building.

Multiple Resource/Thematic Nomination Title: Site # 129
